

THE N.J.A.A.P. BULLETIN

Vol. 1 No. 6

September-October, 1962

UFO LANDS IN RESERVOIR CLIMAX TO N.J. "FLAP"

On Saturday, September 15, 1962, at 7:55 P.M., three boys told police that they had seen a strange oval shaped machine set down in the Oradell, N.J. Reservoir just south of the Oradell Avenue dam. The three said that the object hovered over the water, submerged for a few seconds and then rose vertically and disappeared. As further proof, a fisherman on the opposite side of the Reservoir reported hearing a large splash at just about the time the boys said the object hit the water. To complicate matters still further, large banana shaped tracks were reported in Emerson where still other witnesses claimed the UFO landed first. The U.S. Air Force sent a representative to the area and police then baracaded the land from the public. (Source: The Record, September 16, 1962).

Emerson, N.J. Two more witnesses to the Flying Saucer of Oradell Reservoir told their story to local police last night. William Cooper and Alfred Tauss, both 16, told an unearthly tale supporting reports of a UFO landing in the reservoir Saturday night. Their reports raise to eight the number of persons who allegedly witnessed the landing in the lake. All the known witnesses are under 16. The Cooper and Tauss youths were prompted into telling their parents of their experience by newspaper accounts of the sighting by two groups of youths in neighboring Oradell. "My son and his friend, they saw that thing that landed in the reservoir," Mrs. Helen Cooper told The Record last night. Young Cooper told nervously of the light, many times brighter than a star, that moved quickly back and forth over the pines: "Like it was looking for something," he said. "I thought it was a satellite, a sputnik, or telestar, or something," he said. From a spot near the new junior-senior high school, said the boys, they watched it dip behind the forest of pines rimming the reservoir. "Then we heard a loud bang, like a car door slamming, only louder," young Cooper related. Authorities of the N.Y. Air Defense Sector at McGuire AFB, N.J., are investigating the sighting first reported by three Oradell youths Saturday night. (Source: The Record, September 18, 1962. NOTE: Upon talking to one of the boys, it was found that the object appeared to be domed and had two portholes along its perimeter. At this point, the parents of the witnessed were called up by local police and told that their sons should refrain from speaking about the matter "since the government requested a secrecy policy."

Tuesday, September 18, 1962. Over 100 people flocked to the Oradell Reservoir in hopes of seeing the return of the UFO. Many sported binoculars and cameras in order to observe and record the craft. The situation had grown to such proportions that it was impossible to evade the subject in conversation. Barbershops, school corridors and classrooms hummed with excitement as a small scale panic got under way.

On the early morning of the same day, two Westwood policemen and two Oradell policemen reported seeing a UFO. Westwood Patrolmen Emil Rudloff and Eugene Troy said they saw a huge object, round at the top and tapering into a cone. They said the object was traveling in the east, very fast, and was visible for only 7 or 8 seconds. The object was described as bright yellowish-white. Oradell Patrolmen Martin Hanlon

(See Oradell Patrolmen, Page 8)

EDITORIAL

There are many ways to say "we need money," but we feel that our membership is mature enough to accept the direct approach. Our major expenses are printing and postage, and if it wasn't for a few of our loyal members, this issue would never have been printed. To give you an idea of how much we've spent in our 15-month existence, here are some of our fees:

Our 1st, 2nd, and 4th issues cost us \$12 each; our fifth issue cost us \$30, and this issue cost us \$24, plus \$100 for the cost of our mimeograph, and \$30 for our last meeting. Total: \$220.

Our treasury is almost bare now and you could help out by securing a new member for us. With a doubling of our membership, we would be back in the "pink." If each present member recruited only ONE new member, and each did this, then we'd have no problems. However, from experience we know that half or more -- will do NOTHING, so those who do will have to work twice as hard.

Another reason is a practical one: the lack of ample response to our hopes for expansion. It has been noted that in Great Britain, a magazine can be published with neat print, amply illustrated, on fine stock, attract advertisers and be successful on any subject, no matter how small an audience is involved. This is surely not true in the United States. Our plans to improve the quality of the printing and paper were dependent upon advertisers. The attraction of advertisers was entirely dependent on a large readership. Even secondary reader service offers to gain support were spectacularly unsuccessful, apparently because we didn't throw in free trips to the moon and planets.

Another thing, our funds have been based on the editor's pocket and subscriptions and has gotten to such a point that neither was ample.

Also, our members have not been sending in their reports from the newspapers or ~~other UFO publications. This is why our sighting section is shorter this issue.~~

As you will probably notice, we have upped our dues from \$1.50 to \$2.00. Starting this month, all new memberships will be saved until we reach a total of \$55 - then our Jan.-Feb., 1963 issue will be professionally printed having photographs and illustrations. Your Director works very hard to earn some money to keep our publication "on the market," and so, we ask you to get those memberships rolling in NOW!!! For your convenience, we are enclosing two (2) membership application forms and should you find someone interested in joining give him or her an application and tell them about our organization and its accomplishments.

Should we reach the \$55 mark, we will get to work on the Jan.-Feb. issue ready for the printer. We also promise to release Special Bulletins and Special Reports from our investigative Committee's. So show your Bulletin around - it's a publication you can be proud of - it's published by an organization of which you are a part - a member, not a subscriber.

Get those memberships in NOW!!! The decision is yours - do we live - or die??

Overseas - \$2.00

Official Address: 15 Tyndall Road, Kendall Park, New Jersey, U.S.A.

LETTERS TO THE EDITOR

3

Let me be one of the first to congratulate you on the superb Anniversary Issue. I have always felt that NJAAP publishes one of the very best UFO magazines, but all I can say about this new one is "Wow!" Keep up the good work!

JEROME CLARK
Canby, Minnesota

...Frankly, I am overwhelmed by the efficiency of your group and the numerous activities in which you engage. I have seen a number of UFO magazines, and I would say that, with the exception of the UFO Investigator and the APRO Bulletin, yours is the best I have seen. The large amounts of sightings and other information contained in it is truly a credit to the NJAAP.

DAVE HALPERIN
Levittown, Penna.

Well, you did it again! Bigger and better than your previous efforts and I'd like to say, it's among the very best of any saucerzine on the market today! I will make a prediction...it will be a "Collector's Item" in a short while!

MR. GENE DUPIANTIER, EDITOR
Saucers, Space, & Science
Toronto, Ontario, Canada

Your issues are getting better all the time, and your reporting well done. At the rate you are going now, Ed, it is almost a certainty that NJAAP will become one of the best known, and highly respected UFO research organizations. Your Bulletin is a fine publication, with every possible phase of the field of UFOlogy well covered. So often in this subject, one finds some publications to be somewhat one-tracked.

MRS. JUNE LARSON
Wash. State NICAP Subcommittee
Seattle, Washington

I studied your UFO News Bulletin, July-August issue from title to tail. It's a stupendous job. Keep it up and God bless you.

I like particularly the fact that you preach open-mindedness, both toward the potential writers and your readers. On this point, to be mentioned especially your method of dealing with 'contactees': presentation of BOTH sides to the question in the SAME issue, with an invitation...a sincere invitation to the readers to write and send their views on that particular subject. You couldn't have chosen a better topic: Adamskism. I hope that some of your readers who are experts in interviewing will pay a personal visit to Mr. Adamski himself, bring a tape recorder and dig up some pertinent FACTS regarding him and his associates. Lawyers, Judges, reporters and other fact-finders say and realize that the personal interview technique is one of the best to get out either the veracity or the deceitfulness of an individual. A liar can hide easily behind his printed or even handwritten story. But, when you have him right ~~there, in front of you, talking to you, and~~ others present, there are so many avenues to his spirit that sooner or later you'll get at the facts. There is for instance, to mention but a few items, the tone of his voice, the speed of the same, his gestures, his facial expressions.

Harry Siebert for instance has gotten very good information on George, which should be carried by something bigger than the Hawk Research Society.

REV. GUY J. CYR, S.M.
Lawrence, Mass.

I am writing in support of Adamski not because of blind faith, but because during the past 9 years that I have been connected with flying saucers I have seen and heard a great amount of evidence to support Adamski, but I have not seen any evidence that can be brought against him, new evidence is continually arriving to support him.

There are many contact reports similar to Adamski's that you do not mention: one in Norway, one in Scotland, and one in South America. There have been contacts in England and Wales and other parts of the world. These you ignore, you support monster reports and reports of hostile or apparent hostile landings, yet you go out of your way to make a personal attack on Adamski, why?

Many of those reports from South America may be true, the universe is vast, and those visitors can come from many different places, and their appearances may be varied.

During the past 9 years, I have seen, heard and read many things that confirm the existence in our atmosphere of people from other planets. Some may be hostile, but don't you think some can be very friendly? What is it about Adamski that you don't like? Can it be that perfect peace, harmonious living, and the high moral code, is not accepted because there is greater belief in hostile people? To some people the high moral standards portrayed by Adamski are out of our search and ability and therefore impossible elsewhere.

When real, factual, and undeniable evidence is proven in court against Adamski - evidence that he would admit to be accurate, then I will change some of my views. Because there are some facts in support of Adamski that I know can never be disproved, real evidence is needed and not just someone's opinion based on personal disbelief or a jumbled mass of words that mean nothing. A personal attack on a person's character does nothing for the attacker except lower his own level as a human being.

MR. RONALD ANSTEE
Montreal, Canada

* To answer your first question, why do you refer to the little men as "monsters"? If you believe in Aime Michel's discovery of orthotery you will notice that Michel's orthotery proved beyond a doubt that the little men stories, at least those during the 1954 French sighting wave, were true. We are not making a personal "attack" on Mr. Adamski. We are presenting both sides of the story before we make any statement on Mr. Adamski's claims. In your letter you are referring to the fact that the little men are hostile. Undoubtedly there are other civilizations in the universe which are peaceful, but we did not say the little men are hostile, as yet. We hope you will reconsider your "blasts" as us at items which we did not state. We listen to ALL sides of the UFO subject and present BOTH sides of any question.

- The Director

Fireballs: Interplanetary or Domestic?
by John Nove', Secretary

After the close of World War II, the inexplicable phenomena of fireballs took over the limelight. Soon, scientists and civilians from all over the world attempted to discover the secrets they held.

Were they meteors, electrical discharges, or what? The most important scientific advances occurred in our southwestern states where the so-called green fireballs made nightly appearances. While watching one of these displays, Dr. Lincoln La Paz, world renowned researcher in the field of meteoroids advanced the theory that the fireballs were merely meteors of a copper alloy. No theory can stand without evidence to back it up, so nightly, La Paz and his associates studied the heavens as well as the visitors it contained. After chasing, tracking and observing the fireballs, a conclusion was drawn...the fireballs were not of meteoric origin, at least the majority wasn't. This end was reached by applying the law that all meteors appear to fall earthward while these ascended, descended and ran horizontal at will.

Next on the agenda came the idea that the balls were a phenomenal manifestation of electricity known as ball lightning, a form of pure electricity. But how could this be true? No lightning, no matter what shape it assumes can hover at will...motionless, then pick up speed and easily outrace any of our aircraft.

Another factor also became obvious...the fireballs were constantly seen in geographic locations of the utmost military and strategic importance such as Edwards, Muroc, White Sands, Alamogordo and finally Oak Ridge. It is therefore proper to assume that the fireballs are not of this earth.

REVEREND GUY CYR DESIRES THE FACTS

Mr. Anstee - Will You Accept The Challenge??

Mr. Ronald W.J. Anstee, in your article: George Adamski-Earth's Cosmic Ambassafor, in the July-August issue of the UFO News Bulletin, paragraph 9, you write: "In Adamski's books are many scientific facts on space; facts that he reported in 1952. Now these facts are being confirmed by Russian and American space research. To quote each single item I would have to draw facts from Adamski's books and numerous journals, which would be enough to fill a book." And in your last paragraph: "During the coming months and years many scientific findings confirming Adamski's reports, will continue to be announced."

This, to me, from the context, clearly means that Adamski, in the course of his "contacts" with extraterrestrial people and while riding in their spacecraft, became aware of "many scientific facts on space," which were not known then to earthlings, but which have been, still are, and in the coming years will be "confirmed by Russian and American space research."

If these statements are FACTS, you should be able to prove them very easily, because here we are not dealing with the difficult and intangible questions of the spiritual, supernatural, etc.; but just plain, physical entities and/or events.

I have read, reread and even studied very meticulously every word that Adamski has published on this topic, and I've carefully matched everyone of his so-called 'scientific facts on space' with related statements on space discoveries made since Adamski's first publication on UFOs and, to my disappointment, I didn't find one iota of confirmation.

You claim you have. So, Mr. Anstee, for the benefit of the subscribers to this UFOzine, who are anxiously searching for the truth regarding Adamski's claims, will you, please, quote VERBATIM just 10 passages from his books to prove your point. That should be an easy task, since you claim you have enough items 'to fill a book.'

Be SPECIFIC, come right to the point, and do not try to lose us in broad generalities. If you try that stunt, which is such a handy tool in the hands of the 'Masters' and 'disciples,' we, the readers will come right back and demand FACTS. Our good editor, Mr. Edward Babcock, has given us this splendid opportunity to get at the bottom of adamskism once and for all. So, be sure you stick to the point: Quote and enumerate 10 SPECIFIC 'scientific facts on space', known at that time to only one earthling, the 'Cosmic Ambassador.' Then after that and right next to it, quote another publication published later, embodying a quotation which shows clearly that Adamski had FOREknowledge of certain 'scientific facts on space.' Give us the EXACT titles of these publications you are quoting, plus the precise page from which you lifted the quotation.

Mr. Anstee, don't waste your time and mine, by answering these questions privately in a personal letter to me. I know your name and address and know from experience that this will get us nowhere. This is not a personal affair. It concerns millions of people, and after studying literally hundreds of articles on this precise topic alone, I am sure that many want to know what you are going to say. As I said before, we have here and now a wonderful opportunity to iron this out once and for all. If this is not published here, then I will know someone is looking for the truth, but is afraid to find it. If it is published and you at least try to answer, then we will know that you are sincere; if you don't.....well.

NOTES OF INTEREST

SPECIAL NOTE! The staff of the NJAAP wishes to inform our readers of a new page starting in our November-December issue. This page will be devoted to theories on the propulsion of "flying saucers." Please send in your contributions to Headquarters NOW!!!

Please let us know of any factual UFO discussions on local radio or TV stations, especially those which contribute new, verified sighting reports.

NJAAP MEETING BOOKLET: NJAAP would like to announce that a booklet of our first meeting will be printed if we receive at least 50 orders. The booklet will contain 20-30 pages of information released at the meeting on August 31st. The booklet will also contain photos and illustrations presented at the meeting. The booklet will go on sale for 50¢ a copy and it is asked that all NJAAP members who wish to purchase a copy to fill in the enclosed form and send it to us by the end of November. As soon as 50 orders are received, we will go to press. If, however, we do not receive 50 orders your money will be refunded. **ORDER NOW!!!**

Board of Directors Announces A New Program

James C. Kelsey, a member of the Board of Directors, has proposed a system in which each county of the state could be represented by NJAAP members to perform various activities. The duties and official business of the NJAAP County Chapter shall consist of:

1. Improving the general impression about the UFO subject held by the public of the area.
 - a. Through meetings.
 - b. Through newspapers.
2. Improving the attitude of New Jersey's (or any other state's) newspapers toward UFOs.
 - a. By mailing copies of the NJAAP press releases (to be supplied by International Headquarters) to the newspapers in the county.
 - b. By reporting local, authentic sightings to the area newspapers.
3. Collecting verifiable evidence and to investigate as soon as possible all UFO sightings.
4. To increase the numbers of membership of the NJAAP in the county.

OBTAINING FUNDS: The NJAAP County Chapters are to earn funds by holding meetings open to the public or through other means to be approved by our International Director. Such meetings must present convincing all fact evidence of the reality of the UFOs. Guest speakers, slides, movies, photographs, records, or tapes are advisable for these meetings. A reasonable price should be charged for admittance.

Part Two: NJAAP County Chapters may not charge dues for membership to a chapter. Also, county chapters may not publish their own magazines; however, special press releases may be issued if anything of importance occurs in the area with the consent of the Director.

USE OF FUNDS: Funds are to be used for better material for meetings, for advertising, for special press releases, and for other chapter expenses which are associated to or which benefit the NJAAP.

This is to be entirely on a volunteer-cooperative basis, no salary or commission is to be paid to any individuals for holding an office to these chapters.

When a person from N.J. joins the NJAAP, he automatically becomes a member of the NJAAP Chapter of his county, if such a chapter exists. This membership to the county chapter shall come free of charge as an additional benefit of membership to the NJAAP. It is asked that if you would be interested in this program to write to the NJAAP. This program will be used in ALL states.

NJAAP MEETING OF AUGUST 31st

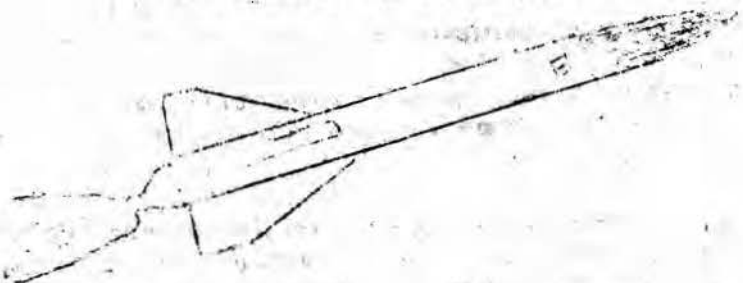

NJAAP's first meeting was, we have to say, fair in that the attendance was less than 50 and none of our Senators or Congressmen could attend due to Congressional duties in Washington. Presented at the meeting were two tape recordings, one of which Mr. Henry Gallart of New York forwarded to us discussing UFO propulsion, the second about the now famous Keyhoe-Tacker debate in December, 1960, on Dave Garroway's program, "Today." Also presented were a number of drawings, 50 UFO slides, and Tim Beckley spoke to us about recent sightings in New Jersey while Alan Katz spoke to us about the basic need for UFO group unity. Also, Peter Gryklien spoke to us about Captain Ruppelt's record, and Mike Jarmus and your Director spoke about various cases of Air Force secrecy and brush-off methods. Display tables were set up showing various books, photos, and UFO publications.

ADVERTISEMENTS

THE COSMIC RESEARCHER: This publication (the Correspondence Organization for the Research on Aerial Phenomena's official journal) is published on a bi-monthly basis. The COSMIC RESEARCHER averages about 15 pages each issue and contains the latest in news and articles. Membership in CORAP is \$1.00 a year for a limited time only and includes a year's subscription to the COSMIC RESEARCHER. For more details write: Director Thomas Roark, 80 North Conestoga Drive, Lancaster, Pennsylvania.

Are you interested in amateur rocketry? If so, be one of the first to get a copy of The Construction of the Altobee II-A Small Amateur Rocket. The Altobee II has reached altitudes in excess of 500 feet though it in itself is less than a foot high. This rocket is recommended for beginners because of its low cost and reliably good performance. How to build the rocket, how to fuel it, and a method of parachute recovery for a larger rocket are included. For the price of 50¢ you can get this booklet and join the ranks of amateur rocketeer.

Send 50¢ to Peter Gryklien
20 Bermington Parkway
Franklin Park, New Jersey

COMING IN FUTURE ISSUES

An analysis of Aime Michel's orthotonic lines.....Evaluation of a Typical Air Force Censored Program.....Who Pilots the UFOs?.....An Evaluation of Adamski's Claims..... UFOs and Hostility.....and a new series starting most likely in the January-February, 1963 issue with a complete analysis of the UFO subject...and much more!

ORADELL PATROLMEN
(continued from Page 1)

and Peter Mchale said they saw a bright light about 4:45 the same morning. James Refferty and Ernest Kuver, maintenance employees of The Record, said they saw two brilliant white lights in the sky about 5 A.M. The lights did not move, but suddenly disappeared in the east in a puff of smoke, they said. Rafferty and Kuver said two employees at the Hackensack City incinerator also saw the phenomenon.

Also about 5 A.M. yesterday, two milkmen reported a strange sight at Kohring Circle in Harrington Park. Robert Pega of Harrington Park said he and a friend saw a tremendous beam of light high in the air. Mrs. John Mischa of Westwood reported a Saturday afternoon sighting. She said she didn't tell her husband because at the time she thought it was a new fangled airplane. She said the thing was flying high and was round and red. (Source: The Record, September 19, 1962).

Wednesday, September 19, 1962. The heavy rain dampened the spirits of many yet 20 people still turned out at the reservoir hoping to catch a glimpse of the controversial craft. Nothing was seen save the rumor that Oradell police shot at a 14-foot man with shotguns. However, in neighboring communities 9 other witnesses, including patrolmen, sighted strange aerial objects, including one which was seen to land. (Source: The Record, September 20, 1962).

Thursday, September 20, 1962. Once again the series of incidents was prolonged as four Emerson boys spotted a similar craft near the reservoir. A formation of three jet fighters approached the UFO and went under it. As the jets attempted to make another pass, the UFO silently rose and disappeared. This, like many of the other objects took on the appearance of burning magnesium, known for its bright white color. (source: The Record, September 21, 1962).

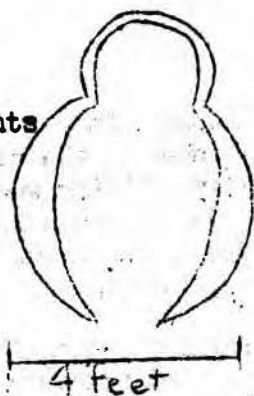

Friday, September 21, 1962. As a vivid and fitting close to an exciting week, two formations of six large, bright white UFOs were seen. The first was observed at Paulaski Park in Hackensack by some youngsters and their parents while 200 people atop Garret Mountain in East Paterson played host to a similar awesome display. (Source: The Record, September 22, 1962).

Monday, September 24, 1962. The Record offices received a letter from a group of Bergenfield boys who claim that they constructed and flew a craft made up of a helium balloon with a balsa wood frame and controlled by radio waves received by a small one horsepower motor. This seemed to be a good enough explanation for the public but in the minds of the witnesses and UFO researchers, there will always be a doubt. (Source: The Record, September 25, 1962).

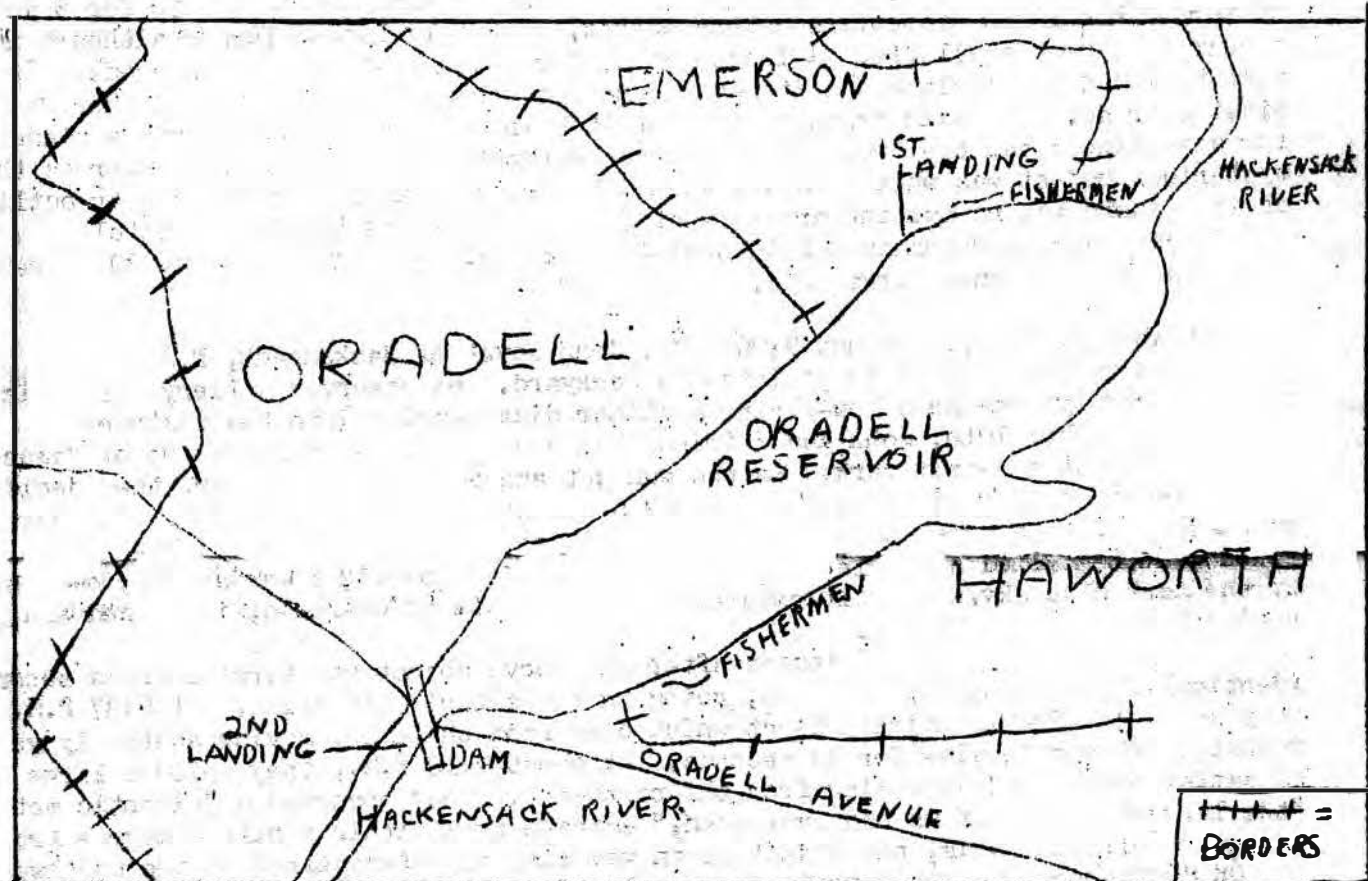

NJAAP has learned that the three boys of the sighting on September 15th have been silenced so that not even a teacher could get any information out of them. The whole thing has come to an abrupt end ever since some Bergenfield boys sent that letter mentioned above to The Record. It is the opinion of this organization that the witnesses observed true UFOs and not the alleged constructed object composed of a helium balloon, balsa wood and radio controlled motor.

Our sincerest thanks to John Nove, who provided NJAAP with a large portion of the information on the Oradell incident. NJAAP's Evaluation Committee will present their analysis of the sightings in the next issue.

UFO footprints
found in
Emerson on
September
15, 1962.

UFO seen on September 16, 1962 by
the Cooper and Tauss youths.

At 10 P.M., the night of August 11th, from Legion Field in Hackettstown, N.J., Steve Ozyjowski and his son Steve Ozyjowski, Jr. (15), both of Great Meadows, N.J., and Wendy Raffalco (11) of Irvington, N.J., were watching a fireworks exhibit to the east when they observed an object to the north, which appeared as a normal star, except that it had a bluish tint. It moved for about five seconds in a west-east direction, leaving a straight, PURPLE trail of the same size (meaning height) of the object. During this time it covered a distance compared to 5 inches of a ruler held at arm's length. The object then disappeared.

In the early evening of Tuesday, August 21st, John D. Billows and his two daughters (9&10) of Great Meadows, N.J., were driving home on Hope Road. They observed to the west a silvery object at about 45 degrees in the sky, which looked metallic and

circular, about the size of a penny held at arm's length. They viewed the object for about 10 minutes during which Mr. Billows pulled over to the side of the road three times to watch. He had the impression that it was flying west since it lowered a few degrees in this time. In a couple of minutes when they reached their home the object could not be seen since trees obstructed the view. (Credit for the two above sightings goes to Jim Kelsey, Great Meadows, N.J.).

On the night of August 21, 1962, Peter Grykien of Franklin Park, N.J., observed a "large, white, star-like" object moving in the northern sky towards him, which would be southward, at about 8:35 P.M. After observing it with the naked eye for 5 seconds he turned his 16x50 binoculars on the object. "It only looked larger although it did appear to have a small rim. I looked at it for a total of about 15 seconds. It then went behind a small cloud and it never came out, though I looked for another 20 minutes or so. The main argument against it being a plane is that I saw a plane at the same time I saw the UFO. The plane was definitely a reddish color whereas the mysterious object was white. Also, when I looked at planes, I could see an outline of it. There was no outline around what I saw. If it was the Echo I satellite, it would have quickly reappeared from behind the cloud. The UFO was about 30 degrees above the horizon when first seen. No noise."

On September 8, 1962, at about 9:00 P.M., John Nove' of Hackensack, N.J., was "motivated by some force" to go into his backyard. He observed a fiery disc which passed directly beneath a low-flying airliner disappearing into the distance.

On September 10th, John and a friend had decided to get a few hours of "saucer watching" in at a nearby park. As the sun set and the sky got darker, they decided to take a short walk and discuss some of the newer stories they had heard. As they approached a large tree, they decided to stop and look around. Suddenly, in the northeast they spied a single fast moving white light coming towards them, outlined by the dark blue sky. When it reached the north, almost overhead, it turned and headed toward the northwest.

Then, at 8:14 P.M., 23 minutes after the above object was first seen, a second identical object appeared overhead, going in an easterly direction. At 8:37 P.M., they spied a third identical object which came from the east, moving southerly very rapidly. It was in view for 10 seconds. At about 9:10 P.M., they spied a large pulsating orange object coming from the northeast. They observed a "gigantic meteor," "the largest either of us had ever seen," emanate from within a half a degree from the object. Following this, the object began wavering and disappeared in the northwest.

On September 12th, they again saw a pulsating object coming in from the south. It inscribed a perfect circle overhead and then sped away toward the south. Before doing so, however, it was engulfed by a red light which seemed to come from its tail.

Several teenagers of Clifton, N.J., reported a star-like UFO blinking on and off overhead, illuminating the area, on September 21, 1962. The light changed colors as they watched. A red light approached the object. As it did the object shout out what appeared to be a "red blast," after which the red light disappeared. This phenomena repeated itself several times. The entire display lasted approximately half an hour. (Credit: F.S.R.O., Carlstadt, N.J., via LOOK-SEE).

William Stock of Lodi, N.J., a watchman at Braen's quarry, was making his rounds early yesterday morning when he thought he saw car headlights on the hill above the company property. He went to investigate and came upon a glowing saucer-shaped object hanging in space, close enough to the ground that "it lit the whole darned area up."

He said it made no noise, but when he shined his jeep headlights at it, the object moved quickly from side to side and up and down, out of the way of the beam. Stock went home without mentioning what he saw to anyone. Then he heard reports that some persons in Oradell reported seeing a similar object earlier this week. When

Stock went back to work early today he decided to go to the same spot on the hill. The shining circular light was again hanging in the sky silently, but this time not as close. Stock telephoned the Hawthorne police. Patrolmen George Gordon, George Jadiny, Frank Saal and Edward Welch, came to the hillside and watched the object with Stock "for a good half hour" they said. "I wanted the police to see it so they wouldn't think I was crazy," Stock said. "The object revolved slowly as it hung in the air. It appeared to have two big lights on it - like auto lights," he said. As it disappeared slowly over the hill, it was bright. Then it would lose its brilliance and come back bright again, Stock said. "It was quite dim as it went out of view in the west behind the hill," he said. Both appearances were sometime between 3 and 5 A.M.

Two policemen in Neptune City, N.J., reported seeing "two gigantic lights" in the sky early Tuesday (September 18th-Dir.) similar to the object Stock saw yesterday and today. Also on Tuesday, a Towaco, N.J. resident said that he saw the same sort of object in the sky. (Source: The Newark, N.J. Evening News, Fri., Sept. 21, 1962).

OTHER REPORTS RECEIVED

On July 19th, at Flamingo, Fla., (located in Flamingo City-Everglades National Park) a group of naturalists were taking a walk through a wooded area. The group was made up of three park rangers and approximately 20 tourists. It was a walk that the rangers scheduled every day for the benefit of the tourists who were interested in Florida wildlife, geology, etc. The walk on this day started as usual - around 11:00 A.M. They had gone about 100 yards into the woods and were approaching a clearing when they saw three "saucer shaped vehicles sitting in the clearing." But as can be expected, the tourists were so startled that they ran for the protection of the ranger station, but one of the rangers remained at the scene, hiding behind a tree. He observed the crafts for 15 minutes when the UFOs suddenly levitated off the ground in a vertical motion and after 30 seconds were out of sight. As they left the ground, the ranger reported a very low hum could be heard along with a high shrill sound hardly distinguishable with the human hearing frequency. The dimension of the three objects were identical, according to the ranger, being about 15 feet in diameter and about 6 feet in depth.

On August 7th, a Pan American flight to Paris, France, was frequented by a rather strange sighting some 150 miles due east of Jacksonville, Florida, out over the Atlantic. At 6:00 P.M. a UFO was spotted on the edge of a cloud bank some $1\frac{1}{2}$ -2 miles to the east of the aircraft. The UFO was spotted by the captain, the copilot, and the flight engineer. They all thought it was a weather balloon. But as the plane moved through the cloud bank to the east side of it, the object could again be seen, only this time it was on the east side alongside the plane.

NJAAP member, Bill Dunn, Jr., who forwarded this and the above report to us, contacted the Jacksonville weather bureau and asked them if they had sent up a balloon that day. Sure enough, they had. They had sent one up about 6 A.M. that morning. The prevailing wind for the entire day had been west - at all altitudes and had averaged about 15 m.p.h. at most altitudes for most of that day. So that would position the balloon at about 150 miles east of Jacksonville at 6 P.M. Was the UFO a balloon? First of all, the plane was making 725 m.p.h. at an altitude of 2500 ft. while the UFO was making 500 m.p.h. at an altitude of 2000 ft. The cloud mass was moving at 7 m.p.h. Thus, the balloon theory would be an unfavorable answer as no balloon can travel at 500 m.p.h. The pilots described the object as a big white glob - they couldn't describe any particular shape, except that it was round.

UFOlogists Burden Increased
by Gene Muplantier, Editor
Saucers, Space, & Science

Whether we like it or not, the job of reporting UFOs is being increased weekly. This is due in part to the launchings of so many satellites for scientific evaluating purposes. There are now over 300 man-made objects in space, including satellite pieces of launching rockets and other "decayed metal objects." Although there are only about 50 satellites in orbit presently, there is three or four times as much other junk per satellite following them. Some satellites have disintegrated into innumerable fragments, all of which will have to plummet to Earth as flaming "meteors" unless some other method is found to rid the air space of them. Naturally this should increase "sightings" of UFOs on a much vaster scale as time goes by. UFOlogists and the general public in every populated part of the world could be fair game for these new added attractions from the sky. In the past, pieces of an Atlas booster were found in Brazil. Several pieces of John Glenn's rocket fell in Africa. No doubt other parts of future rockets shot into the heavens will fall in other parts of the world. False sightings of this nature will increase as time goes by. Many future sightings could be due to even one satellite such as Transit 4A, which was launched on July 29, 1961 by the USA. Over half of the space garbage comes from this one satellite alone. UFOlogists will have to be more alert now, more than ever before if we are to sift through the many sightings for the true UFO, throwing out the sightings which could be identified as ordinary phenomena, including satellite parts over which we have no control. By more careful observation and caution on the part of the observers we may one day get the true facts on the UFOs to the general public as common knowledge.

BACK ISSUES: 1961: December; 1962: Feb. -April, May-June, July-August, are now available. Back issues will sell for \$.40 apiece and in order for us to go to press, we MUST have an order of 30 or more PER ISSUE or your money will be refunded. It is asked that you inclose a 4¢ stamp just in case we cannot get the issues printed. Our Anniversary Issue, dated July-August, will sell for \$.50 a copy. NO ORDERS WILL BE TAKEN AFTER NOVEMBER 30th. Please send cash or money order only payable to the Director only. Thank you.

N.J.A.A.P. is sincerely indebted to Mrs. Betty M. Johnson of Hialeah, Fla., who sent us a \$10 donation when we were on the verge of disbanding a few weeks ago. We greatly appreciate her support and extend our best wishes and sincerest thanks to her.

A year's subscription to THE N.J.A.A.P. BULLETIN makes a most acceptable gift - even if your friend is a sceptic now he won't be at the end of the year!
